Highlights

Highlights are sections or strands of hair that are dyed a few shades lighter than your base color. The main purpose of adding highlights to your hair is to brighten up the overall color of your hair and add softness and dimension to it.

If highlights are lighter sections of hair dyed into your hair, lowlights go in completely the opposite direction. They involve picking up a few thin or thick sections of hair and coloring them in a shade or two darker than your base color.

Balayage - Ombre - Dip Dye

Balayage is all about how the color is applied. With Balayage, not necessarily all the ends will be affected and the transition between dark and light will be much longer and more natural looking.

starts from IDR 1,200,000

Ombre is a hair color technique where all the ends are going to be affected & the transition from the deeper roots and light ends is going to be pretty short. The definition for Ombre is the French word for "color that is shaded or graduated in tone".

Toning

Getting your hair toned is a service that's one of the most important parts of your hair appointment if you're changing the color of your hair. And sometimes, even if you're not. A hair toner is a demi-permanent hair color that can alter the state of the hair's color and pH level.

Silk Lash Extensions

best
seller

These are the mid-weight type of lash extensions, and are finer and more flexible than the synthetic type which makes their retention slightly better. Because of their light weight, silk lashes are good to use on older clients or clients with weak and flimsy natural lashes. Like synthetic lashes, silk come in a variety of curls and lengths.

These types of extensions also hold their curl but the curl tends to be less uniform than synthetic lashes, making them better for clients looking for a more natural look. Silk lashes tend to be thicker than any other type of extensions and also have that rich black color. Silk eyelash extensions tend to be the least comfortable type of extension and are best used for special occasions.

IDR 325,000

Mink Volume 2D

What is the difference between Classic and Volume? Classic eyelash extensions simply mean where one lash extension is glued to one natural eyelash, this method is called 1:1 or one-to-one technique. Volume eyelash extensions are applied the same way, the difference is that one volume lash fan has multiple hairs in it.

Example if two lash extensions are applied to one natural lash then it is called 2D lashes, three lashes in one natural lash would be called 3D lashes, four lashes would be 4D lashes and five lashes would be 5D lashes.

IDR 500,000

Mink Volume Russian 3D-6D

Russian lashes are ultra-fine synthetic lashes that are made from the same soft fiber as classic lashes. Because they're much thinner, the therapist is able to apply more lashes to each natural lash – anything between 2-8. Russian lash extensions are applied in a fan-like shape, which gives more volume too.

Mink Lash Extensions

best
seller

Faux mink eyelash extensions are the most popular extensions used by lash artists today. These, manmade, poly-fiber lashes come in a variety of lengths, diameters and curls, have good flexibility and remain somewhat natural looking depending on the length.

They're designed to imitate real mink fur, but lash artists and clients both love this of extension type because the curl is permanent and they're low maintenance.

No need to curl or put mascara on these types of extensions. The Faux Mink lashes are a little bolder, slightly glossier than the Silk and Mink. Because of their variety of size and length they're great for customizing different looks for each client.

The premise behind hot stone massage therapy is that the direct heat of the stones relaxes muscles, allowing the therapist access to their deeper muscle layers.

Combining hot stone protocols with a full body massage provides a very healing and effective experience. The hot stones also expand blood vessels, which encourages blood flow throughout the body. The hot stones have a sedative effect that can relieve chronic pain, reduce stress and promote deep relaxation.
